+1 (306) 664-1338
Douglas B. Richardson, QC is of counsel in the firm's Saskatoon office. His practice focuses on Government Relations, Education Law, Corporate Governance, Land Development, and Commercial & Financial Issues.
Doug held the role of Solicitor to the University at the University of Saskatchewan for an extensive number of years. He is also a former advisor to both federal and provincial governments on constitutional and intergovernmental issues and other related matters. He served on three occasions with the Government of Canada as a Senior Policy Advisor, Executive Assistant, Chief of Staff and Principal Secretary. He is the former principal of a family-owned business with real estate assets in Saskatchewan, Alberta and Colorado.
Doug is active in professional associations locally and nationally, as well as volunteering his time for local charitable organizations.
PREFERRED PRACTICE AREAS
Commercial and Secured Transactions
Practical answers to support growth.
Corporate and Commercial Law
Extensive experience in corporate and commercial law.
Corporate Governance
Enhancing client effectiveness while reducing liability.

With the (alleged) coronavirus pandemic and the public panic, one has to ask if vaccines will become mandatory in Canada. After all, powerful people have floated the idea of doing just that. But now would be a good time to follow the money and see where it goes.

Bill Gates, the vaccine fetishist, has his hands in vax development in Canada as well. In fact, he has been financing the University of Saskatchewan for many years. InterVac, which is part of USask, has been partnered with the International Vaccine Institute in South Korea

(IVI) for quite some time. IVI is funded by the United Nations Development Programme (UNDP).

Gates pushes for vaccines across the world, but refuses to vaccinate his own children. That should tell you everything you need to know about him.

An interesting connection is a longtime Liberal donor and lobbyist, Douglas Richardson. He has been trying to get funding for InterVac. That's right: he is lobbying to have more of your tax dollars given to InterVac (and USask) to partner with IVI and the Gates Foundation.

International Vaccine Institute Receives $40 Million Grant from the Bill & Melinda Gates Foundation

Funds to help develop new improved vaccine

Dr. Richard Mahoney (English language)
Phone: 82.2.872.2801

Dr. Yong Ae Kim (Korean language)
Phone: 82.2.872.2801

SEOUL, South Korea -- The International Vaccine Institute announced today they have received a $40 million from the Bill & Melinda Gates Foundation. The funds will be used for the development and introduction of new and improved vaccines against three diseases B cholera, dysentery, and typhoid B scourges for the worlds most impoverished.

Bill & Melinda Gates Foundation
206-709-3400
media@gatesfoundation.org
follow @gatesfoundation

This is a momentous event for the poorest of the world. These diseases kill over 1.8 million children and adults each year. The generosity of Bill and Melinda Gates will surely lead to the saving of many of these lives, said Professor Barry Bloom, dean of the Harvard School of Public Health and Chairman of the Institute Board of Trustees.

The International Vaccine Institute (IVI) is a ***not-for-profit International Organization established in 1997 as an initiative by the United Nations Development Programme (UNDP)***. It is among the few organizations in the world dedicated to vaccines and vaccination for global health.

IVI is involved in all aspects of bringing a vaccine to reality: discover new technologies to make new vaccines or improve existing ones; ***develop promising vaccine candidates for licensure and World Health Organization (WHO) prequalification by transferring the technology to manufacturers and partnering with them on clinical development***; deliver licensed vaccines in low-income countries by generating scientific data on the need for vaccines and the impact of vaccination for decision makers; building capacity in vaccinology in developing countries through technical assistance and training to promote self-sufficiency and sustainability in vaccines and vaccination; and building partnerships in Asia and globally for vaccines and global health.

This has long been a partner with InterVac (University of Saskatchewan). It is funded by the United Nations. However, it does get some hefty grants, from the Bill and Melinda Gates Foundation.

The International Vaccine Institute (IVI) of South Korea, a world-renowned international organization ***founded by the United Nations Development Programme***, is collaborating with VIDO-InterVac at the University of Saskatchewan (USask) to better understand the virus causing the COVID-19 pandemic and to develop vaccines and potential treatments.

“The worldwide importance of the ongoing COVID-19 pandemic seems to naturally align our two vaccine institutes and provides the opportunity to build on this partnership,” said Jerome Kim, director general of the IVI based in Seoul.

The two research centres are partnering on a $180,000 project that will look at virus replication, immune responses, and the effect of antivirals and other medicines to combat COVID-19.

The USask funding for the initiative comes from the USask International Blueprint’s Global Innovation Fund and VIDO-InterVac.

South Korea has been one of the countries hardest hit by this virus. IVI has formed a number of ***partnerships with companies and governments*** to advance vaccines against the SARS-CoV-2 virus that causes COVID-19.

The funding collaboration builds on a long-standing relationship between the two institutes, as well as on a ***recent memorandum of understanding (MOU) signed between USask President Peter Stoicheff and Director-General Kim in South Korea in October of 2019***. Read more about the MOU here: https://news.usask.ca/articles/research/2019/usasks-vido-intervac-and-south-koreans-international-vaccine-institute-to-undertake-scientific-exchanges.php

University of Saskatchewan VIDO-InterVac is partnered with the International Vaccine Institute, a United Nations funded group that operates out of South Korea. An interesting partnership indeed. But what is this “memorandum of understanding” that is referenced here?

7. More On InterVac/IVI Partnership

University of Saskatchewan News

VIDO-InterVac associate director Paul Hodgson, Saskatchewan Premier Scott Moe, USask President Peter Stoicheff, and IVI director-general Jerome Kim at signing ceremony.

USask’s VIDO-InterVac and South Korean’s International Vaccine Institute to undertake scientific exchanges

USask’s VIDO-InterVac and South Korea’s International Vaccine Institute (IVI) have signed a memorandum of understanding (MOU) to share expertise and best practices in vaccine development to benefit human and animal health globally.

By RESEARCH PROFILE AND IMPACT
Oct 15, 2019

Located on the Seoul National University campus, ***IVI is a world-renowned organization of the United Nations Development Programme dedicated to vaccines and vaccination for global health***. USask’s VIDO-InterVac is a global leader in infectious disease research and vaccine development and has commercialized eight vaccine technologies, six of which are world firsts.

The MOU, signed this week in Seoul by USask President Peter Stoicheff, VIDO-InterVac associate director Paul Hodgson, and IVI director general Jerome Kim, establishes a formal scientific exchange program between the two organizations in infectious disease research and vaccine development, and enables students, post-doctoral fellows and scientists to complete training and learning exchanges. Saskatchewan Premier Scott Moe was on hand to witness the signing ceremony.

"Infectious diseases are one of the top causes of morbidity and mortality worldwide, and along with vaccine hesitancy (***reluctance or refusal to be vaccinated or to have one's children vaccinated), comprise six of the World Health Organization's top 10 threats to global health in 2019,***" said Hodgson.

The two organizations have ***worked together for more than a decade***. Multi-million dollar ***joint research funded by the Bill and Melinda Gates Foundation*** under one of the foundation's original 43 grand challenges in global health program resulted in the discovery and patenting of a novel adjuvant (an immune response booster) for vaccines.

Very interesting. The University of Saskatchewan and the International Vaccine Institute, (which is funded by the UN), have worked together for over a decade, and the Gates Foundation has provided multi-million dollars to further finance vaccine research.

Also, consider the date: October 15, 2019. What else was going on around that time?

Johns Hopkins Center for Health Security

Watch on

Right. It was Event 201, the pandemic “simulation” held on October 18, 2019, just 3 days later. But sure that is just a strange coincidence. Nothing to see here people.

3. Maternal Immunization May Protect Newborns from Whooping Cough U of S VIDO Study

For some more chilling information on InterVan and Bill Gates, a search here will net more disturbing details.

In 2006 there was Maternal Immunization May Protect Newborns from Whooping Cough U of S VIDO Study.

In 2009 there was VIDO-InterVac Major Partner in HIV/AIDS Vaccine Pilot Plant Bid.

In 2018, Gerds was named Director. There was the Grand Challenges in Global Health projects funded by the Bill and Melinda Gates Foundation. As part of this research, the group developed a novel vaccine platform for neonates that is being used to develop vaccines for pertussis and respiratory syncytial virus.

Vaccine research for this and other “pandemics” isn’t something that is happening off in some distant world. It’s here now, and has been operating in Canada for many years. People need to know who the players are, and who is connected to who.
